PERSONAL HUMAN DESIGN EPHEMERIS

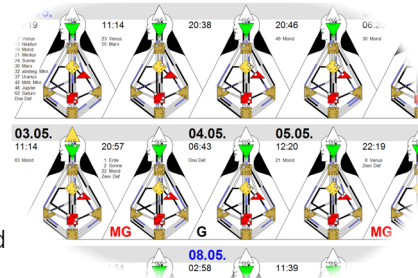

Introduction

Your Personal Ephemeris shows the most accurate information about your daily program graphically. It enables you to follow the general movement of the planets daily transit movement and to get a complete view of the changes and activations as they affect your individual chart.

First you have a **Human Design Mandala** representation of your personal (birth) chart. Then on the following pages, there are your individual charts for all the relevant transits of a month, followed by a table listing all planetary positions for that month.

Graphic Section

There is one *Rave Bodygraph™* representation for each change affected in your birth chart by a transit. (Thus you have variable numbers of charts per day.) It shows your chart as it is changed by the current transiting planetary program, i.e. your birth chart plus the gate activations that cause additional definition. Birth **chart gates** are represented in **black**, **transit gates** in **blue**.

The date and time of the change of definition is stated to the **left** of the chart. All times given refer to local time of the birth chart (or to the time zone you prefer). **Sunday dates** are printed in **blue**.

Below the date and time, the transits that cause the change are listed, i.e. the gate numbers with the planets that activate them. Charts without such references represent the end of a relevant transit, i.e. the point in time when the planet that had caused the activation in your chart (most frequently, the moon) has just moved away, into a gate which is **not relevant** to your chart (if you want to know which gate it has moved to, consult the table).

At the beginning of each month, there is a full list of all current transits that cause additional definition to your birth chart.

If and when a transit causes a change of your definition (e.g. double split becoming single definition) or a change of your authority, this will also be listed in the left-hand column. This information is given with the chart that shows the beginning of this change, i.e. it is valid until stated otherwise. In the left-hand bottom corner you will find the abbreviation of the type,

- **G** Generator
- **MG** Manifesting Generator
- **M** Manifestor
- **P** Projector
- **R** Reflector

The type is printed in **red** whenever it differs from your basic definition. This is then repeated on each chart. Your basic definition, however, is only listed once, with the first chart that returns to it.

Table Section

Corresponding to the graphic section, this sheet lists all the changes that occur in the course of the respective month. Starting from the left, the days and times of the changes are listed in the first columns. In the following columns, the positions of the planets are given:

Zeit		☾	☽	♁	♂	♃	♄	♅	♆	♇	♁
1	08:31	9.1		9.4	16.4		21.3 R				
2	03:47	26.1		9.5	16.5		21.3				
	13:18	11.1		9.6	16.6		21.3				
3	17:34	38.1		5.1	35.1		21.3				
	02:55	54.1		5.1	35.1		21.3				
	12:15	61.1		5.2	35.2		21.3				
	21:35	60.1		5.2	35.2		21.3				

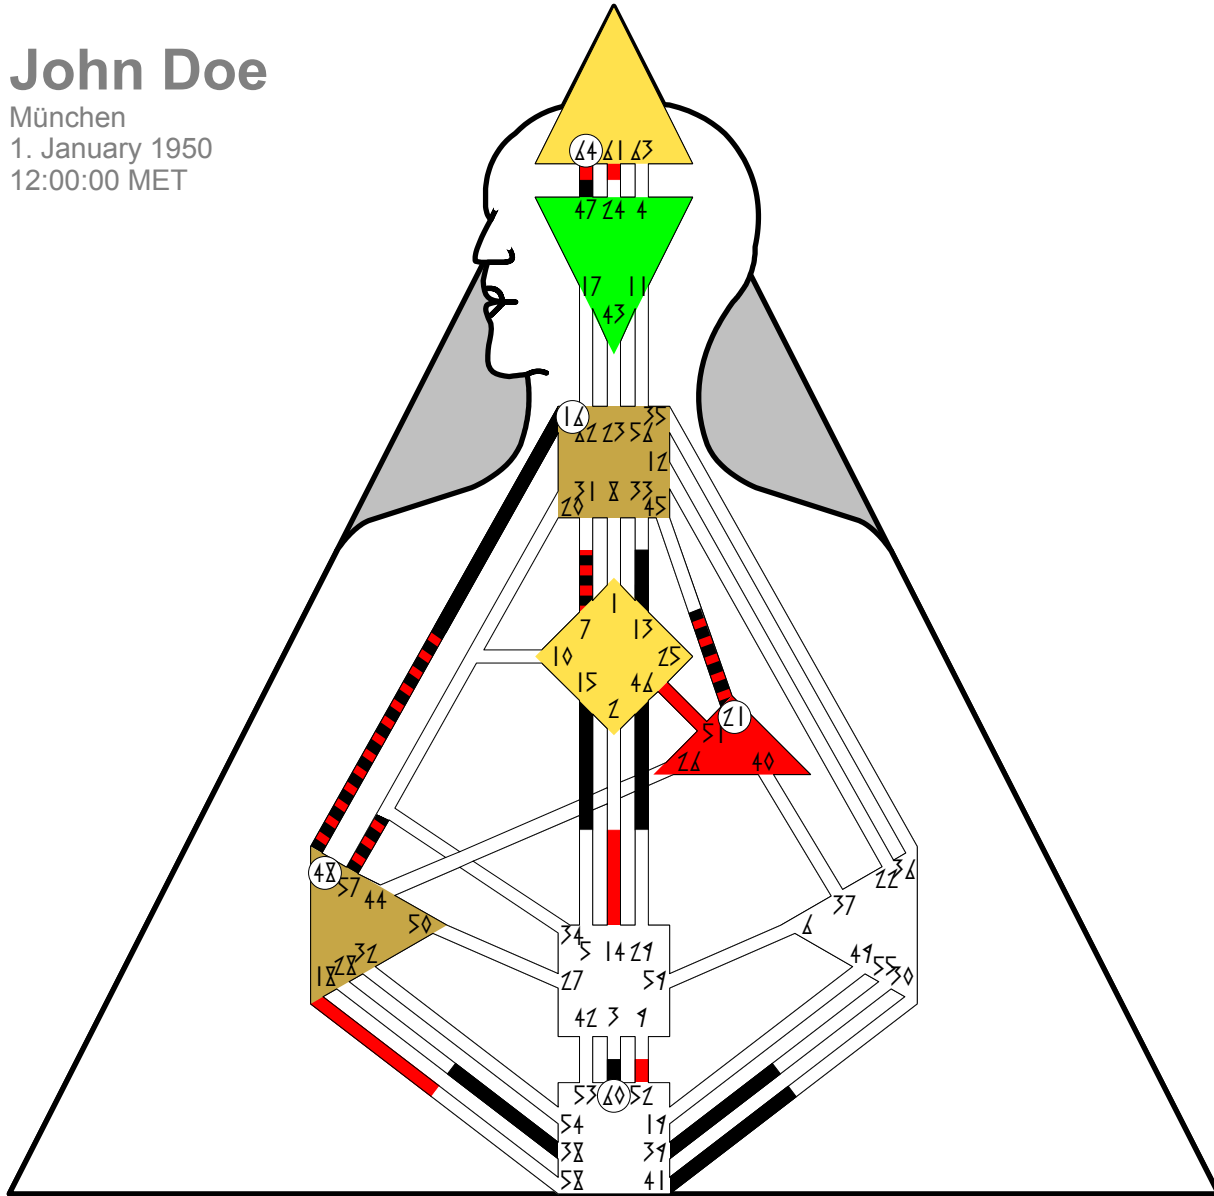

- ☉ Sun
- ♁ Earth
- ☾ Moon
- ♁ North Node
- ♁ South Node
- ♂ Mars
- ♃ Jupiter
- ♄ Saturn
- ♅ Uranus
- ♆ Neptune
- ♇ Pluto
- ♁ Chiron

Within these columns, the positions of the planets are represented in gate.line format (e.g., **12.3** means gate **12**, line **3**). Whenever a planet changes gates, this is made obvious by a little black triangle at the left-hand margin of the column (except for the Moon). To the right of the position you may find a letter for the motion of a planet, **D** meaning **D**irect, **R** meaning **R**etrograde.

In the right-hand columns, you can find the effects on type, definition, and authority. Whilst the positions of the planets are listed for all the times given, the effects on type, definition, and authority are mentioned only once as they start. Here, too, **red** print means that there is a **difference from your birth chart**, whereas black print means that it is the same as in your birth chart.
